One day Alice and Sammy decided to go boating. They took a nice small boat from the beach and started boating along the beach. Then a strong wind started to blow and it took the boat into the open sea. Alice tried to turn the boat and get back to the beach, but she lost balance and fell into the water.

She didn't know what to do. Alice was a good swimmer but at that moment she was afraid and she couldn't swim. Her little brother couldn't help her. She began to cry, "Help! Help!"

Suddenly Alice saw dolphins in the water around her. One dolphin took Alice on his mouth and put her in the boat. Then the dolphins swam away. Little Sammy said, "Did you see that?! That dolphin helped you!" Alice was very happy. She was back in the boat. Alice wanted to say *thank you* to the dolphin but when she looked around, she saw just water and a clear blue sky.

For most schoolchildren summer is the best season. They have these wonderful three-month holidays. Some children go to the countryside and visit their grandparents. Others travel abroad with their families. But many children stay in Moscow because they want to spend summer with their school friends.

You can often see groups of happy children in Moscow in summer. They walk in the city center, ride their bikes in big parks, eat hamburgers in McDonald's, go to the cinema. They don't buy many things, but they enjoy going from shop to shop and looking at beautiful clothes in the shop windows. Boys don't like shops, they prefer playing sports grounds. But all children go to big shopping centers to have lunch, because you can buy cheap fast food and ice cream there.

At weekends parents don't work and they want to be with their children. They take their sons and daughters to museums and cozy cafes. Some families go to their country houses.

In summer children don't have any homework, so they can play computer games or watch TV. The most popular TV programs in this holiday time are sports, different films and cartoons. Also, teenagers spend a lot of time on the Internet, more than they do during their school year.

Balamurali Ambari graduated (*закончил*) last week from the Mount Sinai School of Medicine in New York at the age of 17.

"He certainly is among (*среди*) the youngest who has graduated from a U.S. medical school," said Patty Shea of the Association of American Medical Colleges. She could not say if he was (*был ли*) the youngest.

Balamuri Ambari, a native (*уроженец*) of Vellore, India, moved to Buffalo, New York, with his family when he was 3.

His father is an industrial engineer and his mother is a Maths teacher. He could do calculations (*вычисления*) at 4. At 11, he graduated from high school and wrote a book on AIDS with his older brother Jaya, who is now 24 and also a doctor. At 13, he graduated from New York University.

He plays chess, basketball and ping-pong and is just learning to drive. Patients he has seen so far don't seem to mind (*придавать значение*) his age.

“Part of the reason, I think, is that I’m 6 feet tall, so most people can’t tell I’m so young,” he said.

Dr Ambari, who lives in the New York borough of Queens, will soon begin four years as an intern (*a young doctor in hospital*). He is going to specialize in ophthalmology (*the study of the eyes*). He next hopes to be a Nobel Prize winner.
